Bioshares

Delivering independent investment research to investors on Australian biotech, pharma and healthcare companies.

The Bioshares Advantage

Bioshares is an investment report tailored to needs of biotech and healthcare investors. It is delivered electronically each week. That means **you are kept up to date**.

Bioshares is not wishy-washy. We are independent. We tell investors whether to buy, sell or hold a stock. You're not left confused by new-fangled broker gobbledegook. You get our opinion, delivered fairly and squarely.

You get the best written, most readable, most consistent biotech research produced in Australia.

Can you get more coverage of biotech and healthcare stocks than in Bioshares? We don't think so. Bioshares **covers around 70 of the 145 companies** listed in the Bioshares Index.

Bioshares doesn't paint itself into a corner when it comes to biotech investing. What happens? **We educate. We inform. You learn. You stay ahead. You make money.** We aim to get you in and out of stocks before the crowd comes along.
